

IT Initiative :

Smart Class Room

11 Government Schools were identified as a pilot project for PAN City Area to upgrade 100 classrooms from "Traditional" to "Smart" Classrooms. The idea of the project was not only limited to implement Smart Classrooms equipped with School and Learning Management System, Classroom Infrastructure, IT Infrastructure and internet facility with the teacher training which leads to significant improvement in quality of education. The execution has been completed whereas the handholding part is under progress and will continue for 3 years.

Command and Control Centre

Implementation of Command Control and Communications Centre

This project aims to bring under one roof and on one screen the smart services either already in usage across the city, or to bring those services in an integrated manner under a single-interface that affect the day-to-day lives of the citizens of Indore. These services include Intelligent Traffic Systems, Solid Waste Management, BRTS systems, E-collection of municipal taxes etc. The objective of this is to provide a single command and control centre for smooth and efficient running of systems and to provide early intervention for emergency services.
